Sarria blue-black slate is mined from a quarry in the Orense region of north-west Spain. The slate is very strong and is unusual in that it is flecked with mineral inclusions: these have been tested and shown to be totally stable.

APPEARANCE

Sarria slate is a deep blue-black colour with a distinct blue tinge in sunlight and is attractively speckled with inert mineral inclusions . The colour is totally natural and will not fade, even in the strongest sunlight or harshest environments. The rock splits cleanly, the consistently flat surface of the cleave offering a smooth appearance across a roof's surface.

GUARANTEED

Sarria roofing slate is covered by a 50 year guarantee.
